Proposals must be received by e-mail by February 29, 2012

Introduction

INWES has decided to enhance over the next year its profile and presence in various events. As a first step, it is interesting in having the ability to produce a display as a form of a plastic banner that can be installed in exhibition booths.

Mandate of the organization

INWES was established to: “Strengthen the capacity of individuals, organisations, and corporations through education and professional development to encourage the participation of women in Science, Technology, Engineering, and Mathematics (STEM) worldwide through an international network of organisations and experts.” With the goal of: “Building a better future worldwide through full and effective participation of women and girls in all aspects of Science, Technology, Engineering, and Mathematics (STEM).”

Members include organisational members (not-for-profit organisations and associations supporting women in STEM), corporate members (businesses and corporations interested in or employing women in STEM), individual members, and university/institute members. NWES is a global network of members over 60 countries worldwide. It is a not-for-profit organization governed by a Board of Directors.

Specificities

The banner will have to represent the organization. Photos are available for this banner. The banner should be easy to install as a slim line roll up stand. Dimensions should be about 34" wide (80-100 cm) and about less than 6' in height (2 m high). The version shall be in a digital format to be able to reprint it in various countries. It is important for travel that the banner is in light weight vinyl or plastic.
